

Hygiene measures

Mandatory mask at all times, except in the pool and sunbeds.

Maintain social distance with people outside of your cohabitation group.

Do not use greetings that require physical contact with our staff and other guests that do not live with you.

Wash or sanitise your hands regularly and whenever asked to do so. This is particularly important before mealtimes.

Avoid touching your face, eyes and nose without washing your hands first.

Payments should preferably be charged to your room or made using contactless electronic means.

Follow the instructions regarding hygiene measures indicated on the notices or given by our staff.

Please familiarise yourself with the regulations in force in each area or amenity before use.

If you feel unwell, please remain in your room and contact Reception (Ext. 9). This is particularly important if you have a cough, fever or difficulty breathing.

You may not go barefoot in any of the hotel's communal areas. This includes the sun terraces and the pool perimeters.

Some areas, activities or services remain closed. This is due to official regulations and restrictions currently imposed by the Ministry of Health. Please accept our apologies for any inconvenience this may cause.

Your luggage must be kept inside your room at all times, except on arrival and departure. You are allowed to use bags and handbags.

Please remember that you must shower before using the pools and SPA treatments. We would ask you preferably to take a full shower in your room prior to using the pools or any of our SPA services.

Please familiarise yourself with the admission and capacity policies for the various spaces.

Please spread your towel out on the sunbeds before using them.

Please do not move or alter the furniture layout in communal areas (tables, chairs, sunbeds, etc.). If you wish them to be moved, please contact the staff in charge of the area.
